

What's in my bag?

**Naloxone.** Because I use prescription drugs and I need to be prepared. Naloxone reverses an overdose. Just as my respiration starts to slow, Naloxone kicks in and keeps me breathing. My friends know I always carry it. They know to use it. One day it could save my life— or theirs.

In 2015, drug overdose claimed more lives than motor vehicle crashes.  
Get naloxone now. Ask the pharmacy today.
