## Rhode Island's State Unintentional Drug Overdose Reporting System (SUDORS) Data July 2016 – June 2018

Rachel Scagos, MPH

Governor Gina M. Raimondo's Overdose Prevention and Intervention Task Force August 14, 2019

#### What Is SUDORS Data?

- Unintentional or undetermined, opioid-involved, drug overdose deaths <u>occurring</u> in Rhode Island
- Information from various sources (ME/Vital/Law Enforcement) is abstracted and entered into system
- Data elements include:
  - Demographics
  - Toxicology
  - Circumstances surrounding death
  - Overdose module specific information

July 2016 – June 2018: 569 deaths included in SUDORS

## How Occupation Is Categorized

- Preliminary findings
- Data based on usual occupation on death certificate
- Occupations coded using the Standard Occupational Classification System
  - If not clear → manual review
- Data on average number of workers from:
  - American Community Survey, 2017 (standard occupation categories)

## Occupation Category Examples

Shipper, Packer

Sales

Fisherman, Mechanic, Carpenter, Construction worker,

Assembler, Model maker, Factory worker, Welder, Driver,

District Manager, CEO, Owner, Engineer, Artist, Banking,

Computer analyst, Counselor, Nurse, Teacher, Legal

Administrative assistant, Cashier, Customer service,

Unknown, Not applicable, Employee, Staff member

Never worked, Unemployed, Not working

Demolition, Electrician, Laborer, Plumber

Maintenance worker, Housekeeper

Caretaker, Homemaker, Student

Disability, Disabled, Total disability

Cook, Bartender, Barber, CNA, Security guard,

Occupation Category	Examples (not exhaustive)

**Natural Resources**, **Construction, Maintenance** 

**Production, Transport, and** 

Management, Business,

**Not Seeking Paid Work** 

Unspecified/Unknown/NA

Science, and Arts

Sales and Office

Unemployed

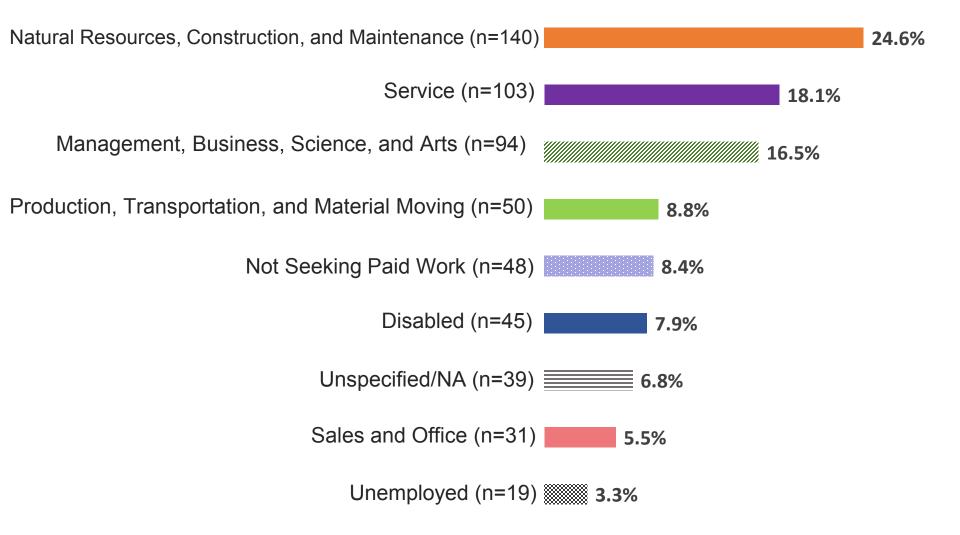

**Disabled**

## Percentage of Opioid-Involved Drug Overdose Deaths by Occupation Category

## Occupation Category by Sex

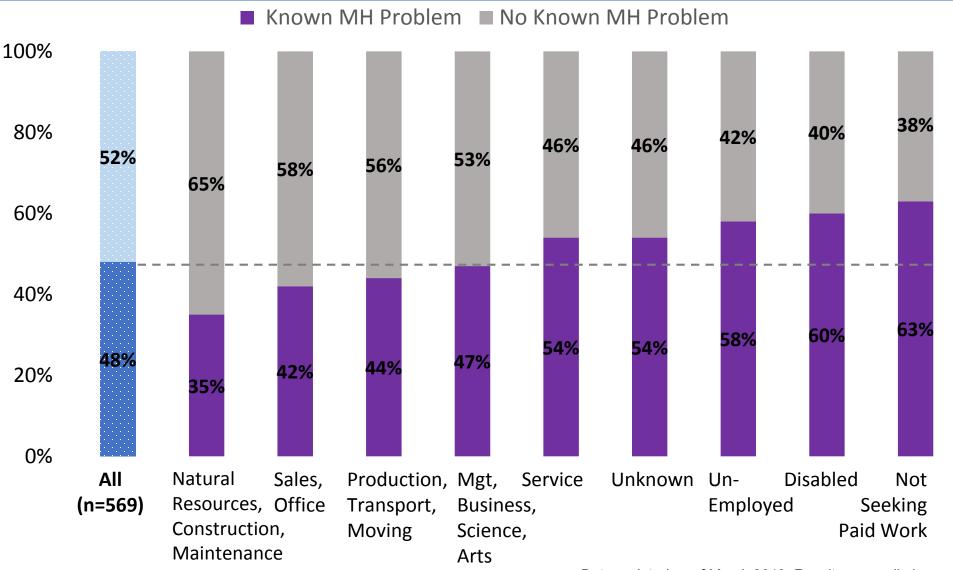

Data updated as of March 2019. Results are preliminary.

# Known Mental Health (MH) Problem by Occupation Category

### Rates of Opioid-Involved Accidental Drug Overdose Death per 100,000 Workers

N/A

Opioid-Involved Accidental/Undetermined Drug Overdose Deaths in Rhode Island: Rate per 100,000 Workers by Occupation						
	Count	Rate per 100,000				
Standard Occupation Categories						
Management, Business, Science, Arts	94	22.7				
Natural Resources, Construction, Maintenance	140	176.7				
Production, Transportation, Material Moving	50	41.4				
Sales, Office	31	12.4				
Service	103	48.4				
Total, All occupations	418	38.9				
Non-Standard Usual Occupation Categories*						
Disabled	45	N/A				
Unemployed	19	N/A				
Not seeking paid work	48	N/A				
Unspecified/Unknown/NA	39	N/A				

151

569

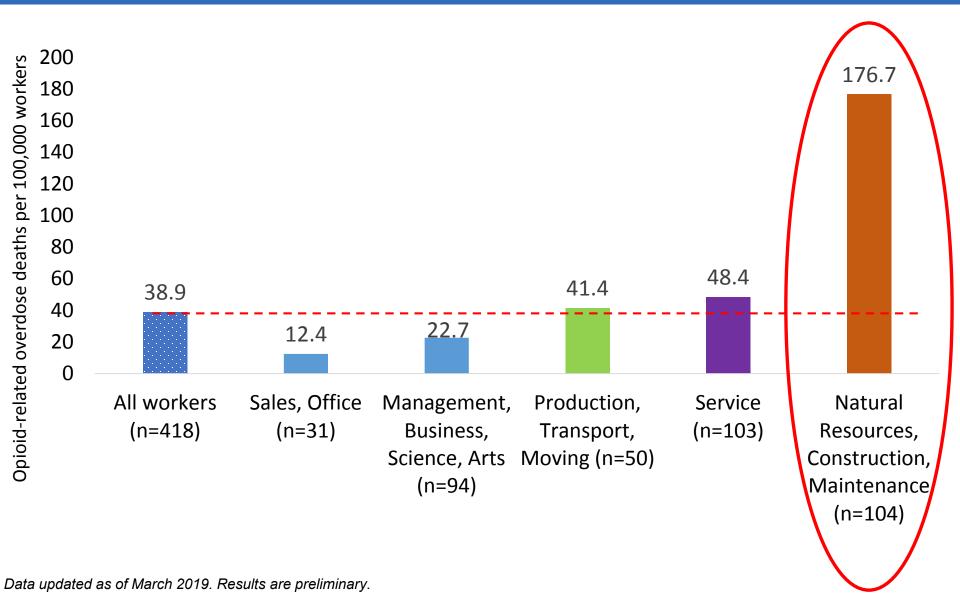

Total, Non-Standard occupations

**All Decedents** 

<sup>\*</sup>Data updated as of March 2019; analyses are preliminary. Denominators for occupation category rates obtained from American Community Survey 2013-2017. Denominators for non-occupation categories obtained from 2017 Social Security and the Bureau of Labor Statistics (average of the monthly unemployment numbers for the time period).

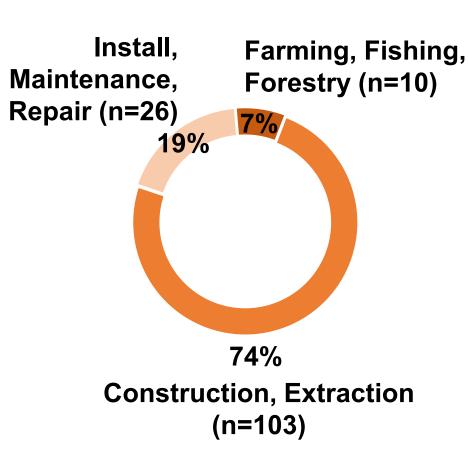

## Rates of Opioid-Involved Accidental Drug Overdose Death by Occupation Category

Highest rate and largest proportion of deaths

Nearly one in five <u>of all</u> <u>victims</u> were in construction and extraction occupations

80% had high school diploma/GED or less education

- 49% had high school diploma/GED
- 31% had less than
   12<sup>th</sup> grade education

Natural
Resources,
Construction,
Maintenance
occupations
(n=140)

Majority (58%)

age 25-44

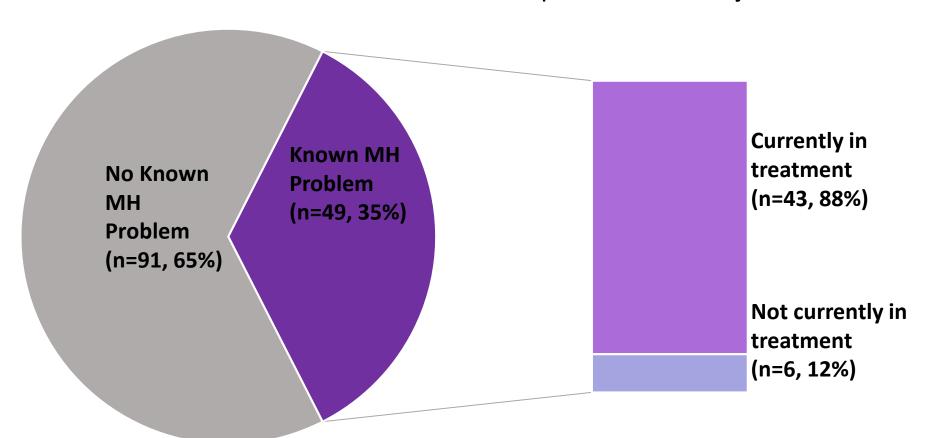

Majority (80%)

White, non-Hispanic 99% **male** 

## 35% had a known mental health problem, compared to 48% among all victims

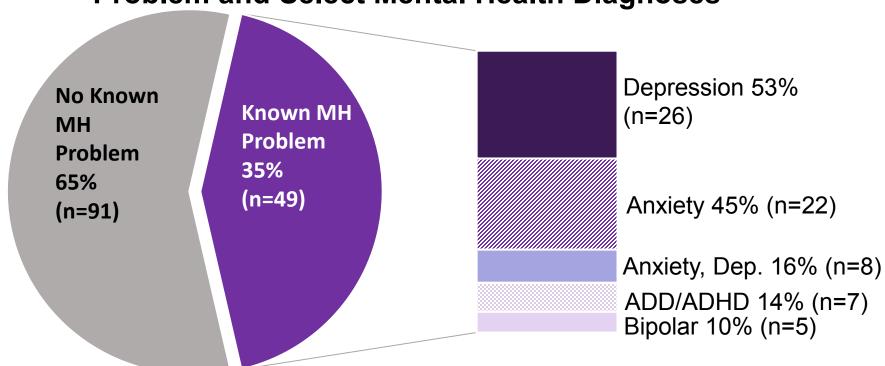

> 88% of those with a known mental health problem currently in treatment

Of those with a known mental health diagnosis, majority diagnosed with **anxiety and/or depression** 

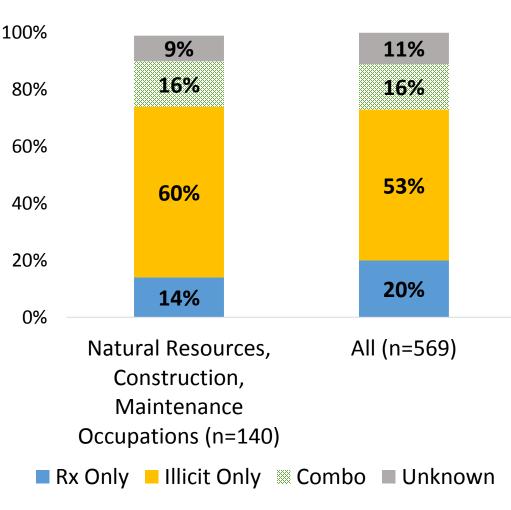

Proportion of Occupation Category by Known Mental Health Problem and Select Mental Health Diagnoses

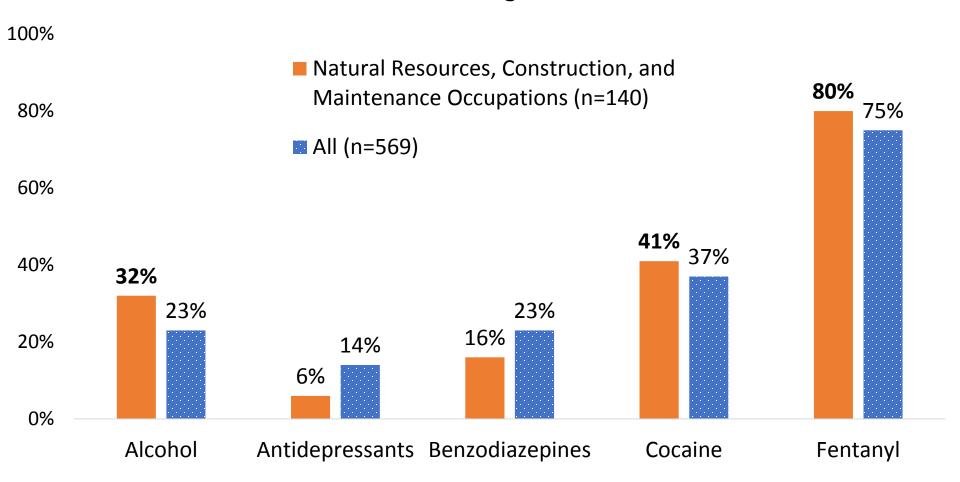

#### Proportion of Accidental Drug Overdose Deaths by Drug Type

- 60% of victims in this category had illicit drug(s) only contribute to their cause of death, compared to 53% of all victims.
- 17% of victims in this category were being treated for acute or chronic pain at the time of overdose, compared to 22% among all victims.

## Proportion of Fatal Accidental Drug Overdose Victims with Select Substances Contributing to Cause of Death

### Summary of Natural Resources, Construction, Maintenance Category

- Highest rate of opioid-involved overdose death
- Largest proportion of all victims in the time period (25%)
- One in five of all victims were specifically in construction and extraction
- Demographics:
  - Almost all were male
  - Majority were 25-44 (58%), White, non-Hispanic (80%), with high school diploma/GED or less (80%)
- Higher proportion with:
  - Illegal drugs only contributing to cause of death
  - Alcohol, cocaine, and/or fentanyl contributing to cause of death
- Lower proportions:
  - Being treated for acute/chronic pain at time of death
  - Known mental health problem

#### What's Next?

- Continuation of analyses, inclusive of other occupation categories
- Review of Accidental Overdose Deaths (ROAD) meeting on October 2 will focus on construction and extraction workers
- Overdose Data to Action grant includes targeted naloxone training
- Partner with Rhode Island Building Futures and Rhode Island Medical Reserve Corps to provide naloxone and overdose prevention training to construction and trade industries

Rachel P. Scagos, MPH Senior Public Health Epidemiologist Center for Health Data and Analysis Rachel.Scagos@health.ri.gov

# Increasing Public-Access Naloxone

The Rhode Island Experience

The Rhode Island Department of Health (RIDOH) offers mini-grants up to \$4,900 to community-based organizations to support projects that address the overdose crisis in Rhode Island.

#### Criteria for a RIDOH mini-grant requires:

You are a non-profit organization.

You have experience offering services and support to people affected by overdose in our state.

Your project is data-driven.

#### NaloxBox Mini-Grant

Rhode Island
Multidisciplinary Review
of Drug Overdose Death
Evaluation Team (MODE)
Team June 2017 Report
Summary and
Recommendations

- In the last two quarters of 2016, there was an increase in the number of public overdose deaths.
- Several deaths occurred in a location where another overdose death had also occurred.
- Prioritize rapid response projects that focus on high-risk populations and settings.
- Implement organizational protocols for using naloxone in public and semi-public locations to prevent and respond to overdoses.

# Mini-Grant Awarded Response: NaloxBox

The NaloxBox mission is to improve the capacity of bystanders to save the lives of victims of opioid overdose by strategically placing overdose response cabinets in settings most in need of quickly accessible, public-use naloxone.

Early administration of naloxone is an essential component to reducing opioid overdose morbidity and mortality.

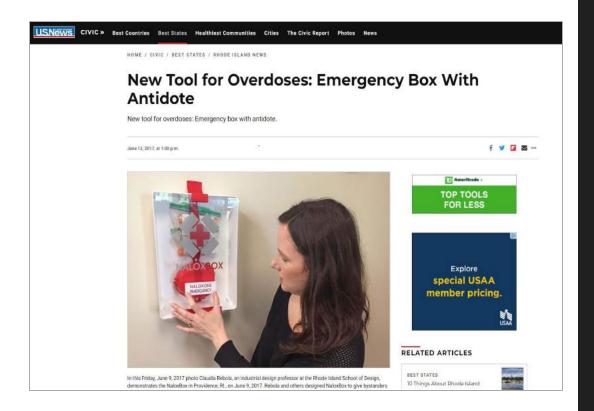

#### Original NaloxBox

Lifespan, Inc. was awarded **two** separate RIDOH mini-grants for the fabrication and placement of NaloxBox units across Rhode Island.

**56 facilities** in Rhode Island have an original NaloxBox unit installed:

 Shelters, recovery houses, feeding sites as well as high foot traffic public locations such as city halls, municipal buildings, transportation hubs, libraries, and private businesses.

## National Attention = Increased Demand

**Associated Press** 

NaloxBox 2.0

A Community Based Solution to a National Crisis

#### NaloxBox.org

#### NaloxBox Standard

#### NaloxBox Standard units:

- Are durable, transparent surface- mounted enclosures.
- Provide a solution to protecting and providing access to lifesaving naloxone in an easy to recognize cabinet.
- Complete with overdose recognition and response cards as well as a barrier device for supporting ventilation.

#### NaloxBox Smart

- NaloxBox Smart units:
  - The smart units allow for the online monitoring and management of your organization's NaloxBox units.
  - Smart units provide data on box temperature and notification of latch openings.
  - Allow for the management of box contents including medication expiration dates.

#### Rhode Island Partners

# What's Next for NaloxBox

Develop resources for businesses and franchises for policies and trainings

Study the effectiveness of public-access naloxone on morbidity and mortality

Utilize data to target high-risk populations and locations

Continue to increase access to naloxone and work to reduce stigma by allowing bystanders to become the help until help arrives

### FY19 AVG RIDOC Demographics

#### Mission Statement

The Rhode Island Department of Corrections (RIDOC) contributes to <u>public safety</u> by maintaining a balanced correctional system of institutional and community <u>programs</u> that provide a range of custodial options, supervision and <u>rehabilitative services</u> in order to facilitate successful offender <u>re-entry</u> into the community upon release.

# Programs & Groups

There are approximately **300 different programs** that may be provided at RIDOC.

These programs provide for a variety of treatment and intervention options.

There are currently **186** active groups in which inmates are enrolled.

# Types of Institutional Programs

- FAMILY/PARENTING PROGRAMS
- BEHAVIOR MODIFICATION/ANGER MANAGEMENT PROGRAMS
- EDUCATION SERVICES
- HEALTH/LIFE SKILLS PROGRAMS
- FAITH-BASED PROGRAMS & RELIGIOUS SERVICES
- SUBSTANCE USE DISORDER
   TREATMENT/RECOVERY SERVICES
- VOCATIONAL TRAINING & EMPLOYMENT SERVICES
